Gas	..... 60,000 BTU
Opening required for installation:	32" * Handle adds 2.5"(6.4cm) to depth

Adjustable Legs

### Durable Construction

The CW61P is built with *prime 20-gauge cold-rolled top and sides* with a 14-gauge base. The *interior is made of Armo Type 1, 20-gauge aluminized steel*. The CW61P comes standard with a stainless steel front made of high quality, 18-gauge stainless steel; the door interior is 18 gauge stainless as well.

### Energy Efficiency

The CW61P features our *new energy-saving "Power-Pak" 4-cell burner system* and our *unique baffle system*. These make our ovens highly efficient and eliminate hot spots. The *heavily insulated walls*, coupled with our *special vent system*, reduces heat loss and keep your gas dollars from going up the stack. The CW61P is powered by 60,000 highly efficient BTUs which *increase its efficiency and recovery rate*.

### Capacity

*The CW61P deck size measures 42"x32"x7" (2) decks in one oven.* The top deck cooks almost as fast - and as well - as the bottom, providing outstanding capacity for your money. Actual cooking capacity depends on the size of the pizza you are cooking. The CW61P will hold twelve (12) 12" pizzas, eight (8) 16" pizzas, or six (6) 18" pizzas. Cooking time will vary according to product, but will average between 8-10 minutes.

### Space Saver

Because the controls are under the doors, the CW61P requires *less installation space* than our competition. This enables you to free up valuable kitchen and/or hood space. The actual width needed is mere 50" for *42"x32"x7" (2) decks*, almost a foot less than the competition. The CW61P *can convert into a CW62PSC by stacking\**, either initially or after your business grows. This option gives you four 42"x32" decks in only 56" of space. (\*will increase width)

### Design Plus

The CW61P has the *controls in the lower front for ease of operation and space savings*. This also places the controls in their own *air-conditioned area* so they are not affected by outside influences. In addition, the CW61P is *totally thermocoupled* and allows you to replace individual parts as opposed to throwing away the whole system.
